HOLBECH **SKOT**

Holbech Skot is a lovely reimagined version of the well known Skot lamp.
With its solid built design and the essence of the maritime can the Holbech Skot compliment old architecture as well as new while leaving an impressionable touch.
Holbech Skot is produced in several sizes and shapes which helps you to create an elegant mood for both indoor and outdoor lighting making the environment gleam the perfect way.

Holbech Skot capable of wall and ceiling mounting
Holbech Skot is a robust IP65 LED luminaire, approved for public access halls.
The luminaire is built to withstand vandalism and can be delivered with anti-theft screws.
The lamp is easy to mount, and has connections with availability for looping.

Skot with smart control.
The luminaire exist with different sensors and dimming options, these options can be seen below.
The luminaire can be delivered with built-in microwave sensor and wireless communication which makes it a perfect solution for halls and staircases. With the help of wireless communication can one lamp register movement and turn on the light on the floor as well as the floor above and below.
Skot has a corridor function too, where it can be set so it gives a constant light of 10% of the capable lightvolume until the lamp registers movement. Holbech Skot glows a nice diffused light outwards and in a fashionable indirect light on the mounting surface.

Specifications:
Dimensions: Ø240 x 130 mm.
Cover: Half or cross.
Watt: 8W~1200lm / or E27 depending of light source.

Technical add-ons:
B = Base/Socket E27 for LED (no sensor)
M = Base/ Socket E27 for LED with sensor
U = Standard without sensor, built in LED Print & Driver (dimming possible)
S = Microwave sensor – Dimming – Corridor, Built in LED Print & Driver.
T = Microwave sensor – Dimming – Corridor – Wireless Communication, Built in LED Print & Driver.

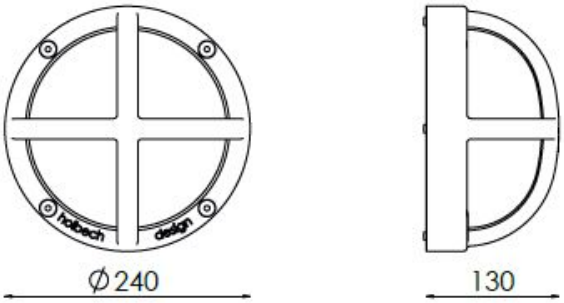
Generel data:
Connection: 230V able for looping(for: Built in LED driver, U, S, T)
Socket: Cast aluminium, powder coated.
Frontglass: Opal/Clear polycarbonate or Acryl.
Protection: Cl. 1, Protectionclass IP65, Vandalclass IK10, Certified to public hallways.
Lightcolour: 2700K, 3000K or 4000K, Colour rendering Ra>83
Extra add-ons: Dimming 1-10V, DALI, Switch dim.
(Can be delivered with battery for emergency lightning.)

Anvendelse:
Holbech Skot is suitable for facades, corridors, stairwells, bicycle basements, etc.

5 years warranty – CE-certified

Danish design – Produced in Denmark

Design: Lars Holbech



Brief history of the Skot lamp:
The iconic Skot lamp from Laurits Knudsen 1929, has since been interpreted numerous times as example Lyfa, Louis Poulsen & Solar. The lamp has always been popular because of its maritime look and its well built design.
In 1932 was Lauritz Knudsen's Skot lamp used on the royal ship of Denmark. The name Skot comes from the name "skod" which is the Danish word for a partition on a ship. As the language evolved the named evolved into "skot".

Reservations are made for printing errors and changes due to technical developments or regulatory requirements.
